

TECKENTRUP

DOOR SOLUTIONS

DESIGN | SECURITY | SERVICE

**SOMETIMES
YOU
HAVE TO
BE A
PIONEER
TO
OPEN
DOORS
AND
GATES**

**YOUR SPECIALIST
FOR INDIVIDUAL
SOLUTIONS**

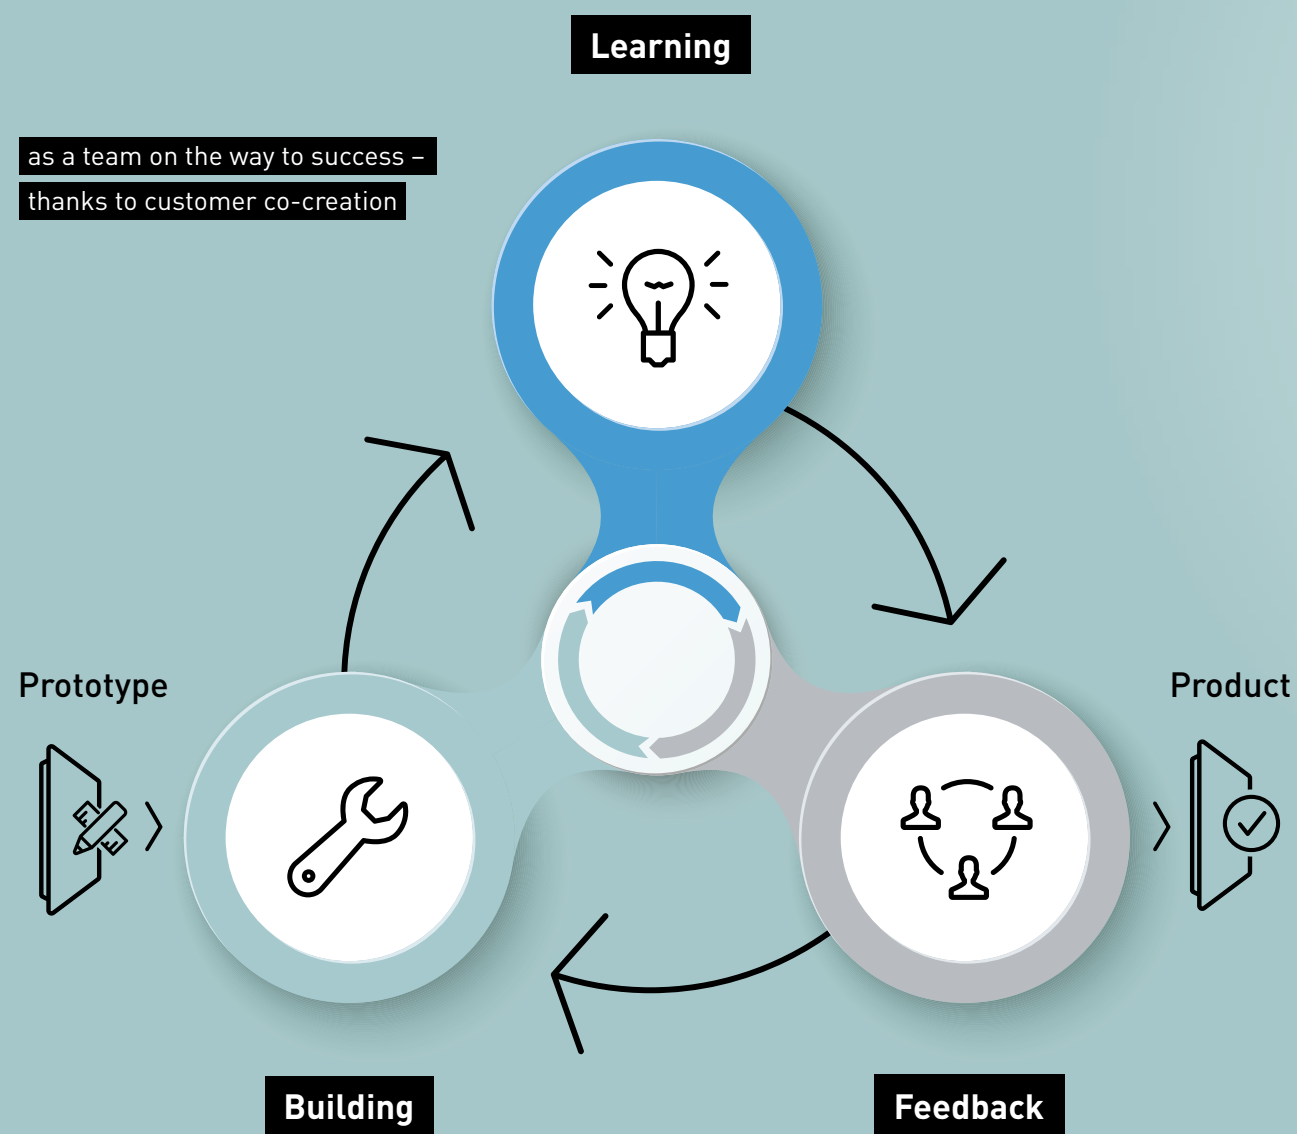

Kai Teckentrup
Owner and
Managing Director

**You are the focus
of our actions**

At Teckentrup we know that the best solutions consist of many elements. There is no one-size-fits-all solution. For this reason, you, our customers, and your personal demands are at the core of our actions from the outset. What are the current market demands? What do you expect from doors and gates? And where can we improve, both in terms of products as well as services?

We have integrated a process into our everyday activities to develop new ideas in collaboration with you and find innovative solutions as well as responses to these and many other issues. As a result we open the door to progress and continue to guarantee our high quality standards in the future while simultaneously offering the options to bring your individual demands and needs to life.

TOGETHER INTO A SUCCESSFUL FUTURE

We stay in touch and are familiar with your requirements to offer you ideal products and services. In this process, close collaboration with our specialist partners is particularly important. Only if we purposefully align our expertise and needs, share experiences and develop new, better methods as a team, will we pioneer the way to our most important goal: Passionate customers.

Collaboration products include our modular door system and our special logistics service. For instance, we supply order-specific packaging to prevent additional order picking processes and structure your operative processes more efficiently.

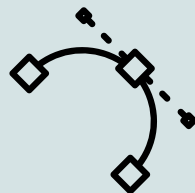

We have also developed a tool to configure offers that has been modelled on our partners' requirements. Thanks to the tool customers can easily and quickly create orders while our system already checks their feasibility at this early stage. This saves time, prevents errors and provides a platform to directly clarify many technical questions.

**OUR PROMISE:
WE WILL FIND THE
BEST SOLUTION.
YOUR SOLUTION.**

Regardless of whether you aim to tackle major projects or need a solution for a minor detail – throughout development, production and sales, whatever we do, the underlying question for us is: **WHAT IS THE BEST SOLUTION FOR YOU?**

THREE STANDARDS FOR A MORE UNIQUE CHARACTER

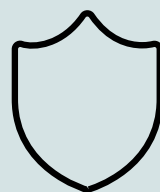

We produce more than doors. We develop individual solutions that turn customers into fans and leave no demands unanswered. Our three standards, accurately geared towards your needs, also play a vital part in this: **Design. Security. Service.**

DESIGN:

We link functionality and aesthetics.

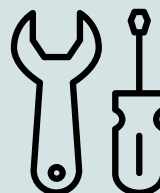

Because good design represents innovative technology that meets users' needs. Our products unveil new worlds and offer many individual design options. Our philosophy is based on designers and engineers working hand in hand from the outset. Consequently, we guarantee that intelligent ideas are also conclusive at a second glance and challenging design stands the test of time.

SECURITY:

We link systems to protection.

Our doors meet the highest standards and have been certified accordingly. They protect from threats including fire, smoke, sound and burglaries. We will take the time to discuss required standards and develop comprehensive security concepts to protect people and valuable items as required.

SERVICE:

We link speed to reliability.

Proximity, clear structures, everything from a single source. This is the service advantage Teckentrup delivers. From product development to installation, from committed support by our specialist consultants, to professional maintenance: we will be there for you right away. And we are happy to take the time you need.

EVERYTHING FROM A SINGLE SOURCE

Our most striking selling points are our 80 years experience and our comprehensive expertise surrounding fire protection. As a result, we guarantee our **PROFESSIONAL** (doors), **INDUSTRIAL** (industrial doors) and **HOME** (garage doors) products represent cutting-edge technology and meet the most stringent quality standards.

DOOR SOLUTIONS FOR MORE SECURITY AND PERFORMANCE

FIRE PROTECTION DOORS
SMOKE PROTECTION DOORS
SECURITY DOORS
SOUND INSULATION DOORS
MULTI-PURPOSE DOORS
INTERNAL DOORS
STAINLESS STEEL DOORS

Functionality that accurately meets all requirements as well as specifications and guarantees almost any design variations, these are the criteria to make your project a success. And this is precisely what our **PROFESSIONAL** product range delivers. From concepts based on on-site data, innovative

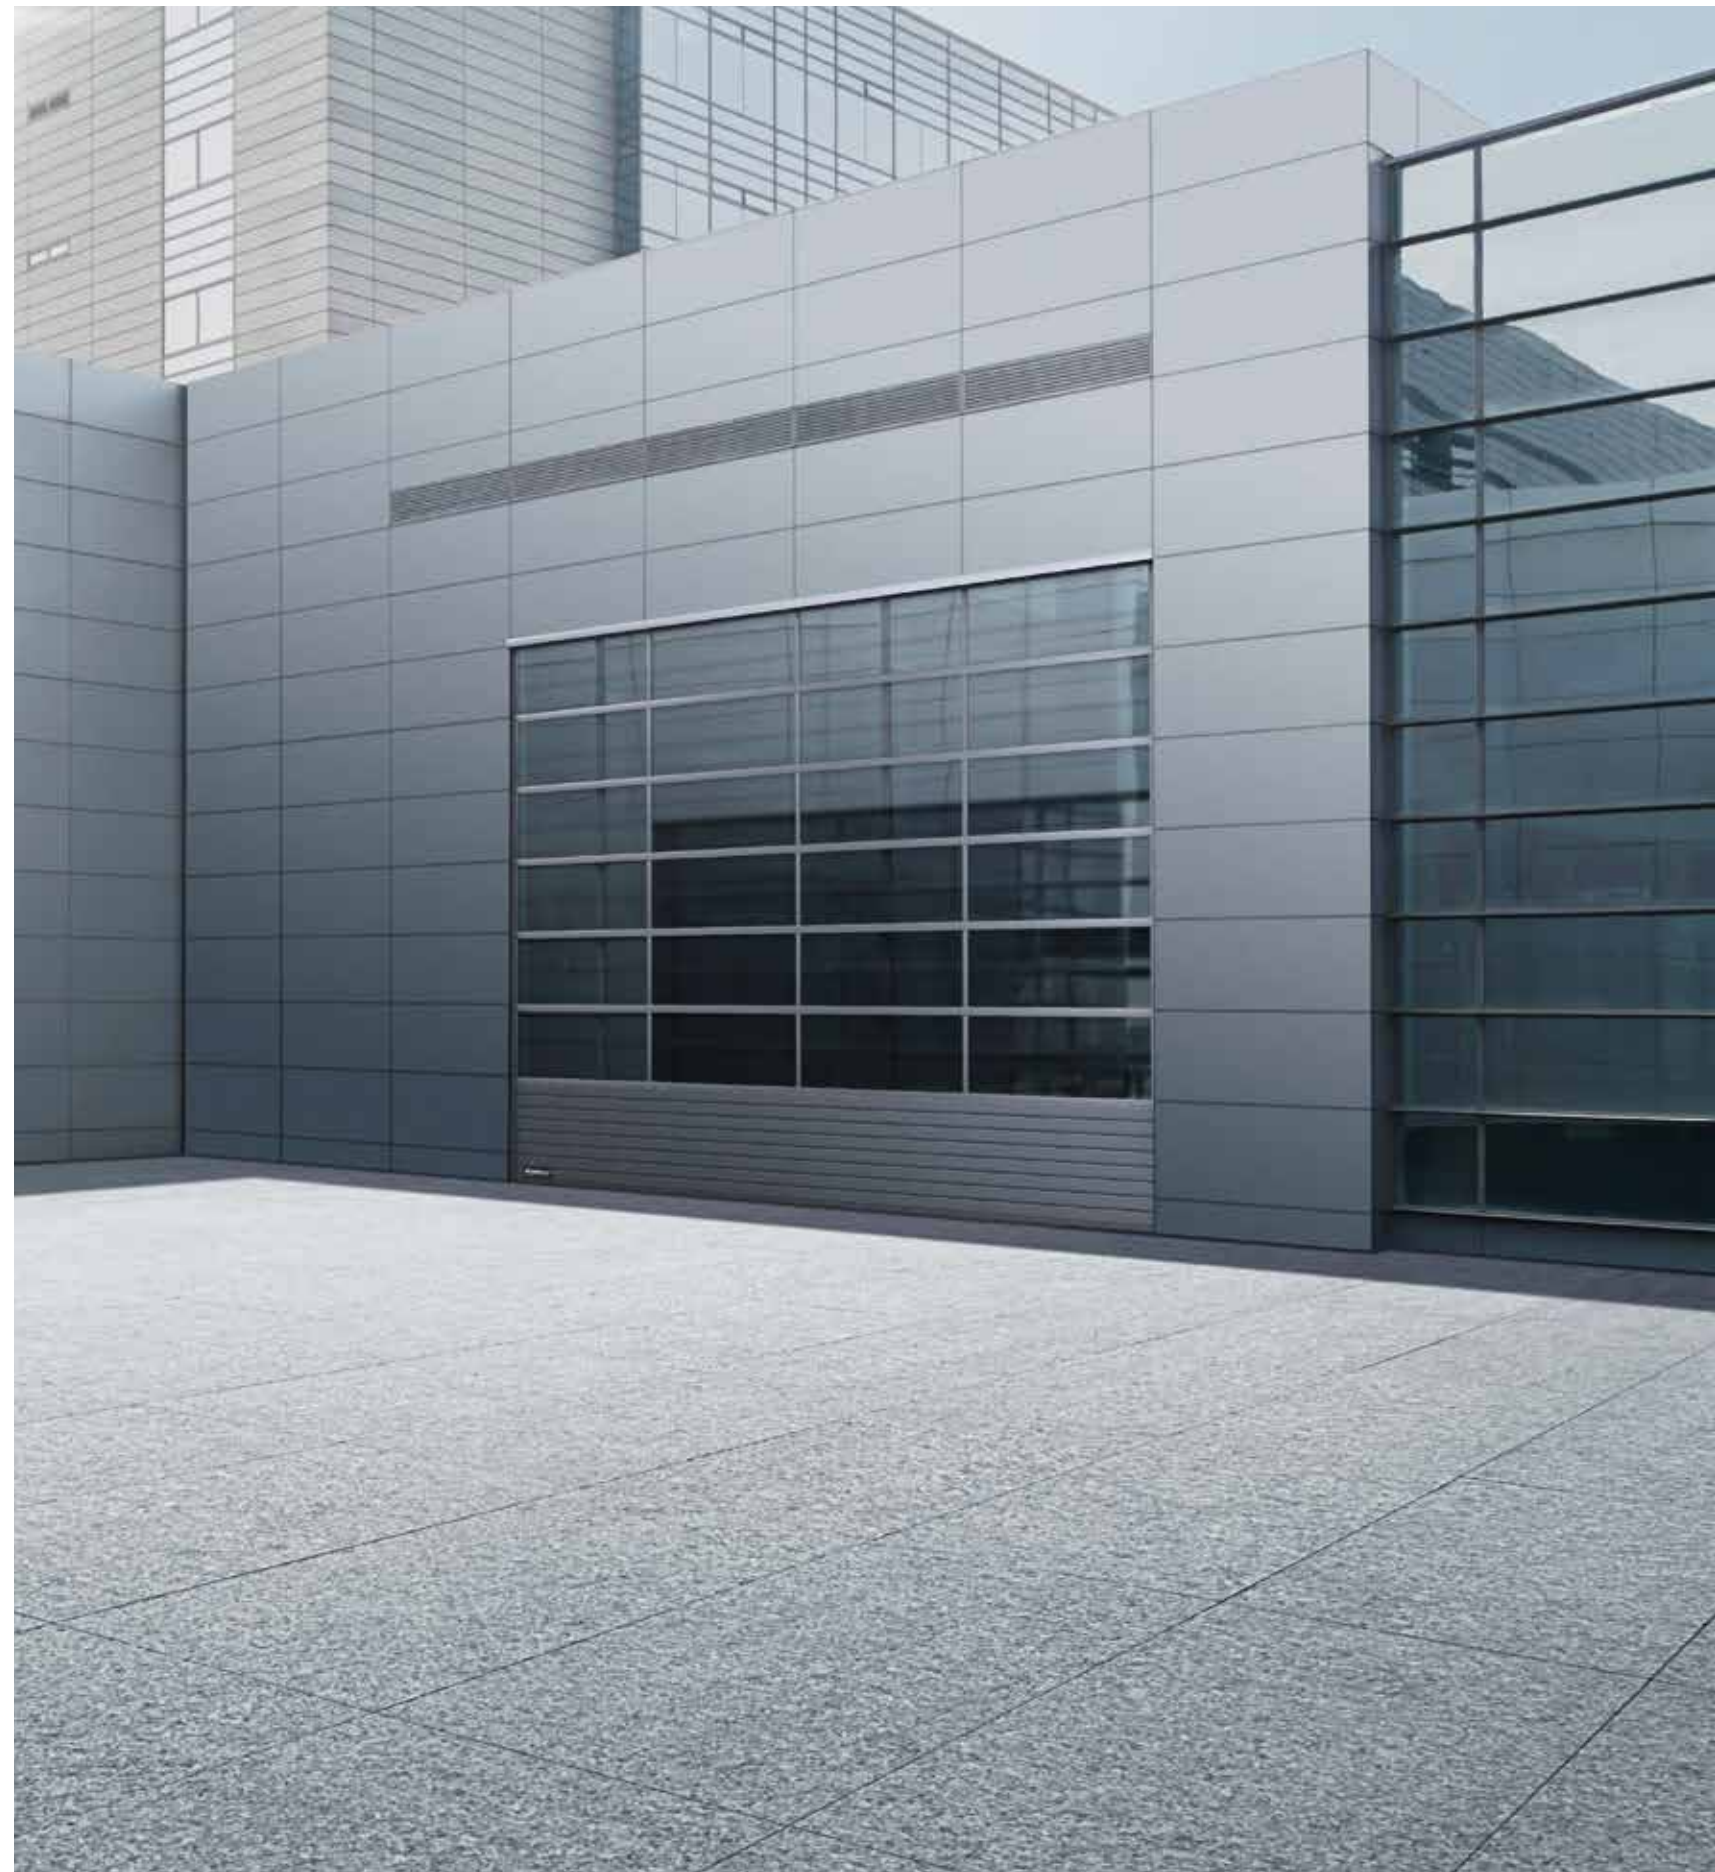

products, components and system solutions to diligent and rigorous manufacturing processes as well as advice and service throughout all project phases – we can guarantee that our comprehensive range features the matching door.

RELIABLE INDUSTRIAL DOORS THAT KEEP YOUR BUSINESS RUNNING

INDUSTRIAL SECTIONAL DOORS
ROLLER SHUTTERS AND ROLLER GRILLES
FIRE PROTECTION DOORS
FOLDING DOORS

We are all aware that an unwanted disruption of industrial processes brings about significant costs. And that's exactly why our industrial doors are, above all, extremely robust and absolutely reliable. What's more: Our industrial doors are not only durable and particularly efficient, thanks to outstanding insulation, they also contribute to saving energy. Our doors also score high marks with

their quiet and rapid movement, as part of which, comprehensive protection mechanisms prevent accidents. Professional maintenance guarantees that doors meet your demands in the long run. Our drives and control systems can be easily configured to meet your individual demands and integrate them into security concepts.

SMART GARAGE DOORS: CONVENIENT, SECURE AND ATTRACTIVE

CARTECK SECTIONAL DOORS

CARTECK UP-AND-OVER GARAGE DOORS

CARTECK DRIVES

Whether it's a new development or a refurbishment project, you need to be able to rely on practical solutions and technologies that ideally adapt to on-site specifications. This also applies to garage doors. Our sectional doors are products for professionals that give you maximum security and sophisticated technology. On the basis of an ample range of available designs we can configure the door you envisaged that matches your personal plans. Our

traditional up-and-over garage doors also inspire with reliable technology and individual design options. It goes without saying that we offer different models as well as comprehensive accessories. For this reason, our numerous functional upgrades for garage doors generate genuine added value thanks to elements including security light barriers, LED-lighting, humidity sensors or visual parking aids to boost security, convenience and functionality.

360°

You can always rely on our complete service package that complements our product range. From planning and creating offers to ordering and repairs, we will always support you to make sure you need not worry about procedures and order processes. Just rely on us – rely on our 360° service:

Product and sales seminars

Seriously enhance your expertise for even more successful sales negotiations and more efficient product installation.

Configurators

From configuration to order: quickly and easily design the product you want online.

Sales + office staff

We provide you with a permanent contact who will always find the right solution for you.

Technical hotline

From project planning to facility support: You can rely on our technical experts to answer your complex questions.

Delivery service

Be it direct deliveries to the construction site, meeting agreed deadlines or taking care of urgent orders at short notice: save time and money thanks to our dedicated delivery ranges and services.

Assembly

If required, we install all doors and gates on site. We also support you during measurement and give technical advice.

Maintenance

Be on the safe side thanks to our legally watertight maintenance agreements for installations requiring statutory testing.

Repairs

Benefit from our particularly fast response times in the event of repairs.

OUR COMPLETE SERVICE TO BOOST YOUR SUCCESS RATE.

OUR REFERENCES

Satisfied customers are the best references. And we have plenty of those. From Elbe Philharmonic Hall and Radisson Red Cape Town hotel to Klimahaus Bremerhaven scientific exhibition site – our doors and gates are everywhere. See for yourself and let us convince you!

ELBE PHILHARMONIC HALL HAMBURG

Many doors were fitted with portal coverings as well as custom surface trims. We supplied special surfaces in order to meet the demanding architectural requirements. We also installed numerous fire protection as well as security doors and fitted gates in doorways. A perfect interplay of security and design.

KLIMAHAUS BREMERHAVEN

We supplied around 160 doors to guarantee the protection of many people in a small space. Doors must stand the test of time in all climate zones as they are frequently faced with different climatic conditions on the opposite side: For instance Teckentrup fire protection doors lead visitors from sandy desert and icy wilderness to fire escapes with a neutral climate.

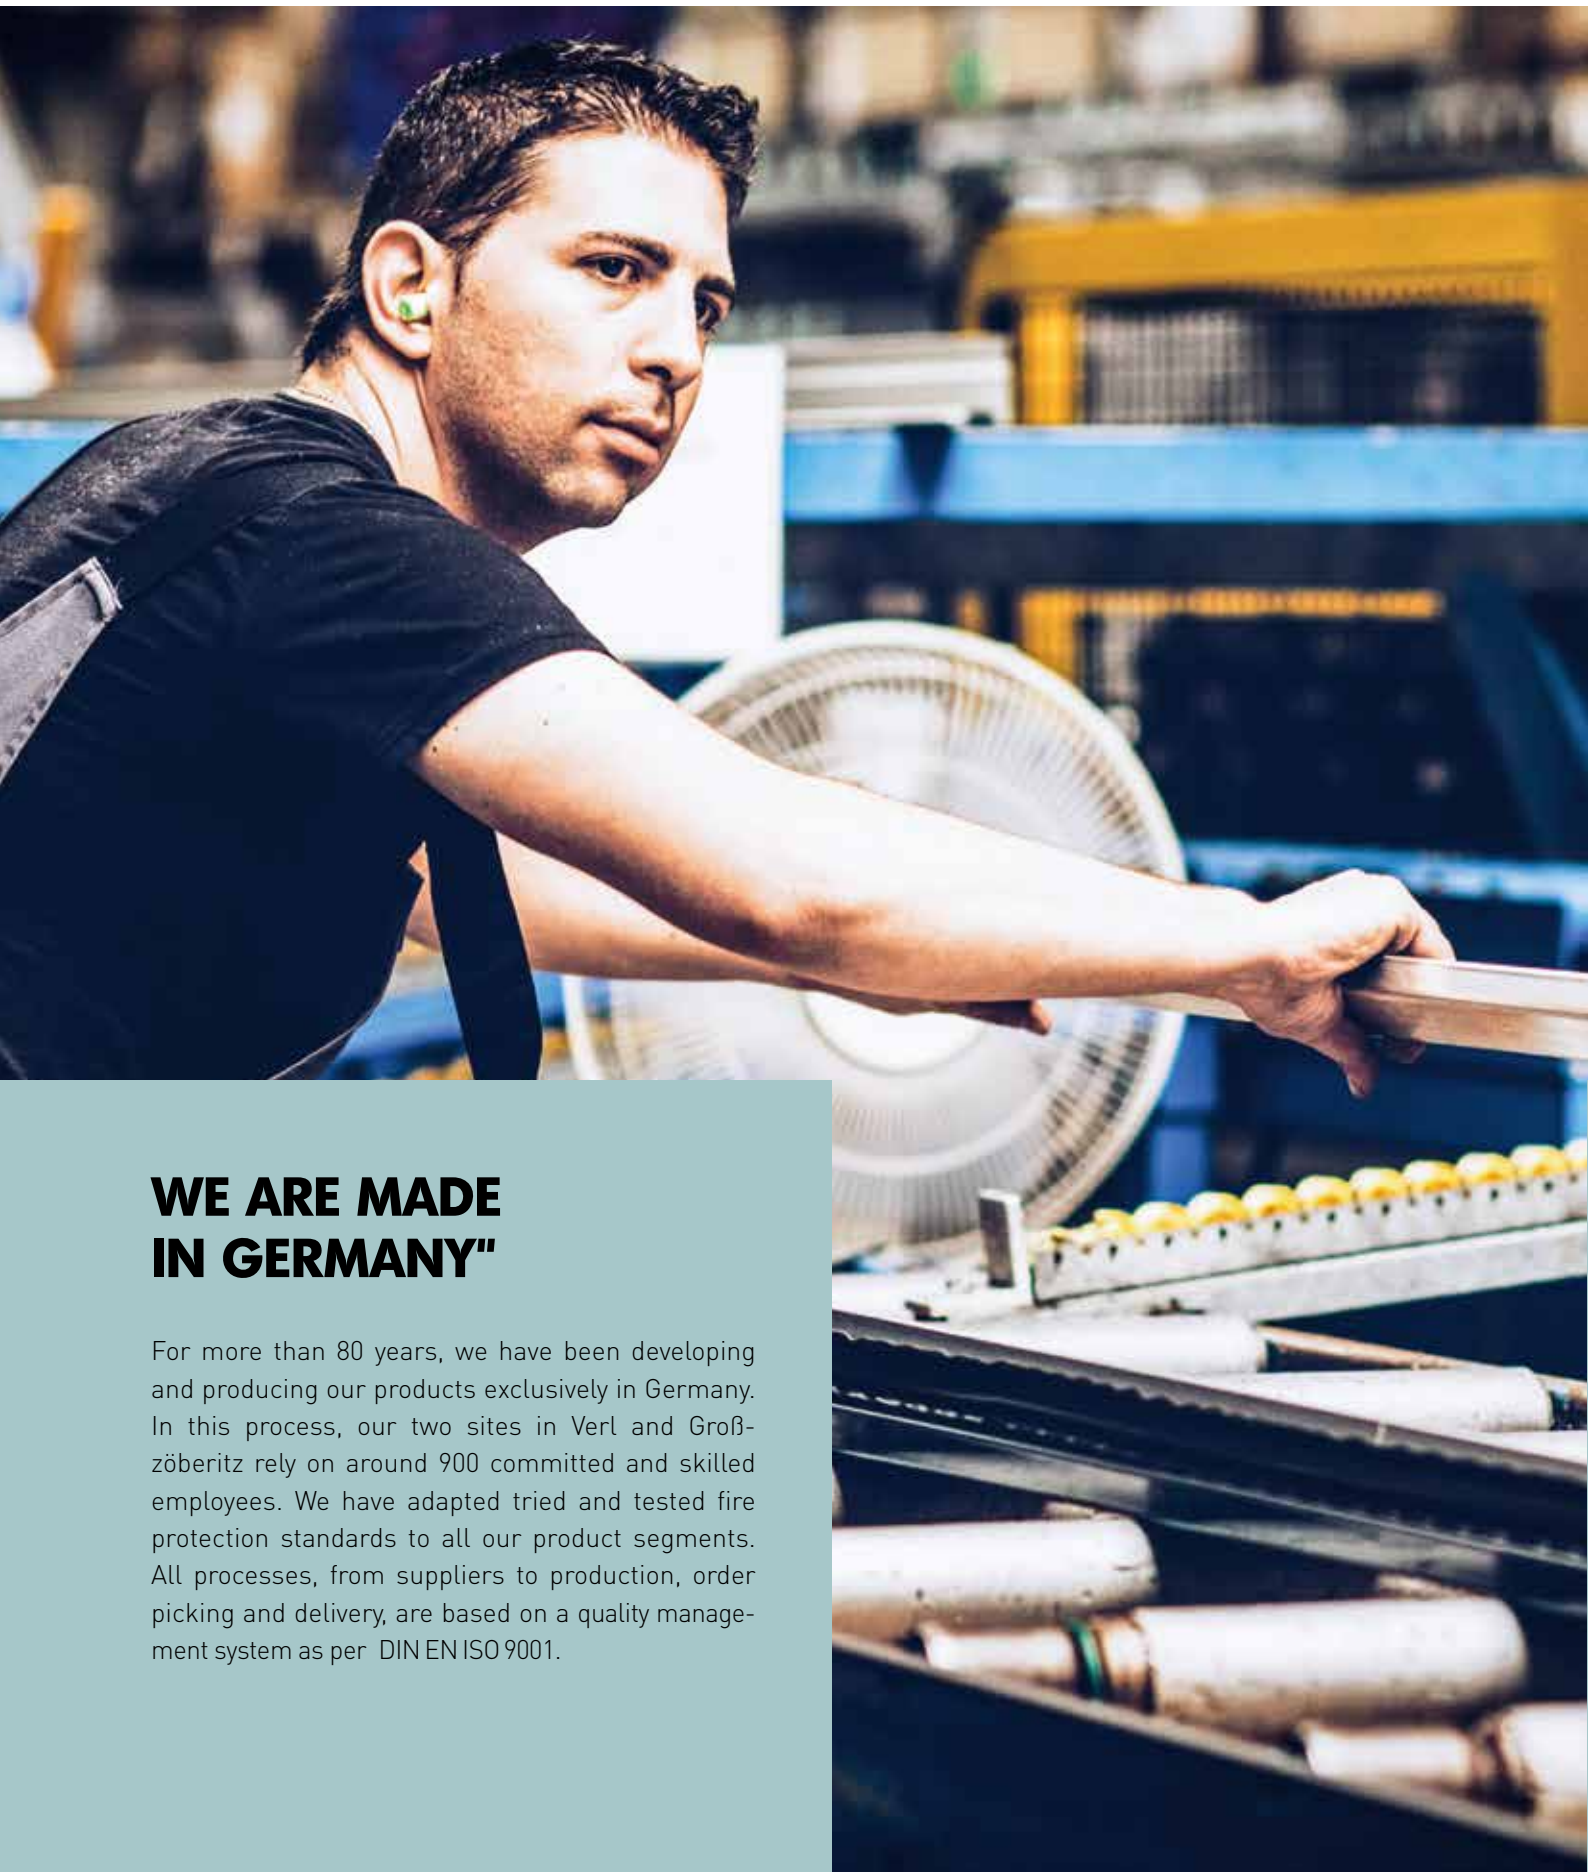

TRUCKPORT ELVIS AG KNÜLLWALD

The HGV traffic at Elvis AG's Truckport site demanded extremely wide access points. Two Teckentrup roller shutters with a movable mullion met this requirement and created sufficient room for HGVs coming in and out.

RADISSON RED CAPE TOWN

The "Radisson Red" in Cape Town is exposed to significant noise levels. Thanks to our 567 certified fire protection and sound insulation doors we mastered this challenge effortlessly on the basis of our products' certificates with validity beyond our domestic market. Our specialised, comprehensive advice goes hand in hand with the essential depth of our range.

WE ARE MADE IN GERMANY"

For more than 80 years, we have been developing and producing our products exclusively in Germany. In this process, our two sites in Verl and Großzöberitz rely on around 900 committed and skilled employees. We have adapted tried and tested fire protection standards to all our product segments. All processes, from suppliers to production, order picking and delivery, are based on a quality management system as per DIN EN ISO 9001.

FROM GERMANY INTO THE WORLD

Our many years of experience form the basis to also finding ideal solutions for our international customers.

WE OPERATE GLOBALLY

Our pioneering products and our distinct understanding of service also guarantee our international success. With over 20 subsidiaries and partners around the globe we can rely on comprehensive, global market expertise and product certifications. As a result, we develop doors to accurately match specified, national requirements and master international projects exclusively with products we have produced ourselves.

WE BUILD SUSTAINABILITY

Handling natural resources responsibly is particularly important to us. Consequently, we support you in your environmentally friendly and sustainable construction projects. All our in-house products have been certified as per Environmental Product Declaration standard (EPD). At the same time, we implement integrated management systems as per DIN EN ISO 14001 (environment), BS OHSAS 18001 (occupational health and safety), DIN EN ISO 50001 (energy) for sustainable production processes and operational health and safety.

THE TECKENTRUP PROMISE

Always the best solution: Your solution.
