

Our high-speed-roller door ThermoTeck – simply convincing!

Strong design

- Visually matching the standard roller door
- Up to 10000 mm width and 9 000 mm height feasible
- XXL-doors with centre post enables widths up to 20 m
- Available in standard and preferred colours as well as RAL of your choice
- Wind resistance class up to WK4
- The slats roll up using minimum space due to their special profile

Strong safety

- Internal passage control, secure from weather conditions and vandalism
- Automatic obstacle recognition by integrated light barrier
- Also suitable for outside use as a security shutter

Strong service

- Quick spare parts service
- Direct delivery to the building site

Light curtain – Intelligent fastening

Due to integrated holes in the guiding rail the light curtain can be mounted on the rear side of the guiding rails.

Advantages:

- Good accessibility
- Easy to clean
- Replaceable in the case of emergency
- Protected from soil and dirt

Belt system

The patented and safety-optimised Teckentrup belt system dampens running noise and reduces wear and tear significantly. Durability test with more than 200.000 cycles

With unhook-function:

The belt system unhooks automatically off the fixing unit (injury protection).

INDUSTRIAL | HIGH-SPEED ROLLER DOOR 2.0 ThermoTeck Speed

THE HIGH-SPEED ROLLER DOOR 2.0 ThermoTeck Speed

Fast. Installation-friendly.

Reliable.

Your advantages

- ✓ Fast running speed
- ✓ Very low wear and tear
- ✓ Reasonable cost/benefit ratio

We reserve the right to make technical changes. 01/10/17 (GB) The product images in this brochure are to be regarded as examples. The fitted products therefore do not necessarily correspond to the reference offers.

TECKENTRUP
DOOR SOLUTIONS

Exactly to your taste: Discover our range of designs

Opens fast, closes fast: Saves energy on the double.

Count on energy efficiency and profitability with our new high-speed roller door.

Because of the high continuous operational standards and a robust design the HRD* meets necessary requirements for all application situations - in particular also suitable for outside use. With high running speed of up to 1,5 metres per second our high-speed roller door ensures a high level of energy efficiency due to minimal heat loss. Minimising the time a door stays open means less heat loss during the door movement phase. This pays off especially for high usage doors.

Furthermore this door combines effective sound insulation , a high-level of assembly-friendliness and extraordinary low wear and tear characteristics which lead to a good cost/benefit ratio.

Our efficient high-speed roller door Thermo Teck Speed - Look and see on www.teckentrup.biz.

* High-speed roller door

Choose from our ThermoTeck modules:

- Heat-insulated with micro-profiled surface
- Reliable, extremely robust and optically appealing
- Available with glazing or ventilation grille

Standard Colours

Preferred colours

Find the right colour shade:

- Standard: galvanised surface with transparent protective paint
- Coil-coated: six preferred and four standard colours
- Powder-coated: individual colour design
- Individual colour design for manifold door designs matching any facade by RAL of your choice

**ROBUST IN CONTINUOUS USE.
OUR HIGH-SPEED ROLLER DOOR
THERMOTECK SPEED
OPTIMISES WORK PROCESSES
AND PROVIDES MORE
ENERGY EFFICIENCY.**

(Ekkehard Grohs, research and development department, Teckentrup)

Your advantages:

- Expanded product range: High-speed roller doors exploits new building types, e.g. logistic warehouses or highly-frequented industrial buildings
- Assembly-friendliness: Installation just as easy as for the standard roller door
- The construction principle proven for many years ensures highest quality – with many components tried and tested for 15 years and only a few new additional components like the belt system and light curtain
- Diverse installation options:
 - Wood (minimum 240 mm)
 - Aerated concrete with steel frame (minimum 200 mm)
 - Masonry (minimum 120 mm)
 - Concrete (minimum 100 mm)
 - Steel
