GREATER SECURITY FOR LIFE AND VALUABLES.

ALWAYS THE BEST SOLUTION. YOUR SOLUTION.

TECKENTRUP
DOOR SOLUTIONS

YOUR PARTNER FOR SECURE DOOR SOLUTIONS.

For over 90 years, Teckentrup has been manufacturing high-quality doors "Made in Germany" for the whole of Europe. With our expertise and technical competence, we create standard or customised solutions that meet individual requirements and ensure greater safety for life and property. Our products in the Professional (doors), Industrial (industrial doors) and Home (garage doors) sectors combine the highest functional quality with state-of-the-art technology. What sets us apart is not only our simple, digital collaboration, but also our comprehensive service that you can rely on at all times: from planning and quotation to ordering, repair and maintenance.

Jens Heckenmüller (Managing Director),
Kai Teckentrup (Owner/Partner),
Christian Hanke (Managing Director) (from left to right)

ALWAYS THE BEST SOLUTION. YOUR SOLUTION.

Teckentrup is synonymous with reliability, customer focus and a consistent solution-oriented approach. Our strength lies in the combination of sound technical expertise, rapid responsiveness and transparent, digital collaboration. This allows us to reduce complexity for you, create planning reliability and support projects throughout all phases – from concept to installation. Whether you are an architect, general contractor, dealer, installer or builder: Your expectations are our motivation. Working together, we develop tailor-made products and services, ensuring project success with clearly structured processes.

ONE TEAM.
ONE VISION.

More than cooperation – genuine collaboration.
Reliable, professional, cooperative.

TEAMWORK WITH ATTITUDE.

Teckentrup employs people who take responsibility for quality, reliable results and progress. As a family-run company with clear values, we focus on commitment and long-term thinking. We aim to develop the best solution for all our customers: technically well thought-out, economically viable and sustainably implemented. The aim is always to protect people and values.

This understanding shapes our collaboration, which is always open and based on partnership. More than 900 employees design, manufacture, advise and support projects throughout all phases – with a high level of commitment and professional expertise. Through training, qualification and further development, we safeguard our expertise for the future.

BETTER IDEAS, ALWAYS.

Well thought out down to the last detail – reliable in daily use.

ALWAYS THE RIGHT DOOR SOLUTION FOR YOUR SECURITY.

When function and architecture come together, reliable systems are required. The doors from our PROFESSIONAL product range meet the highest standards for fire, smoke, sound and burglary protection – certified, economical and customisable for both indoor and outdoor use. A well-thought-out system design and precise details ensure long-lasting functionality, clear aesthetics and simpler installation processes.

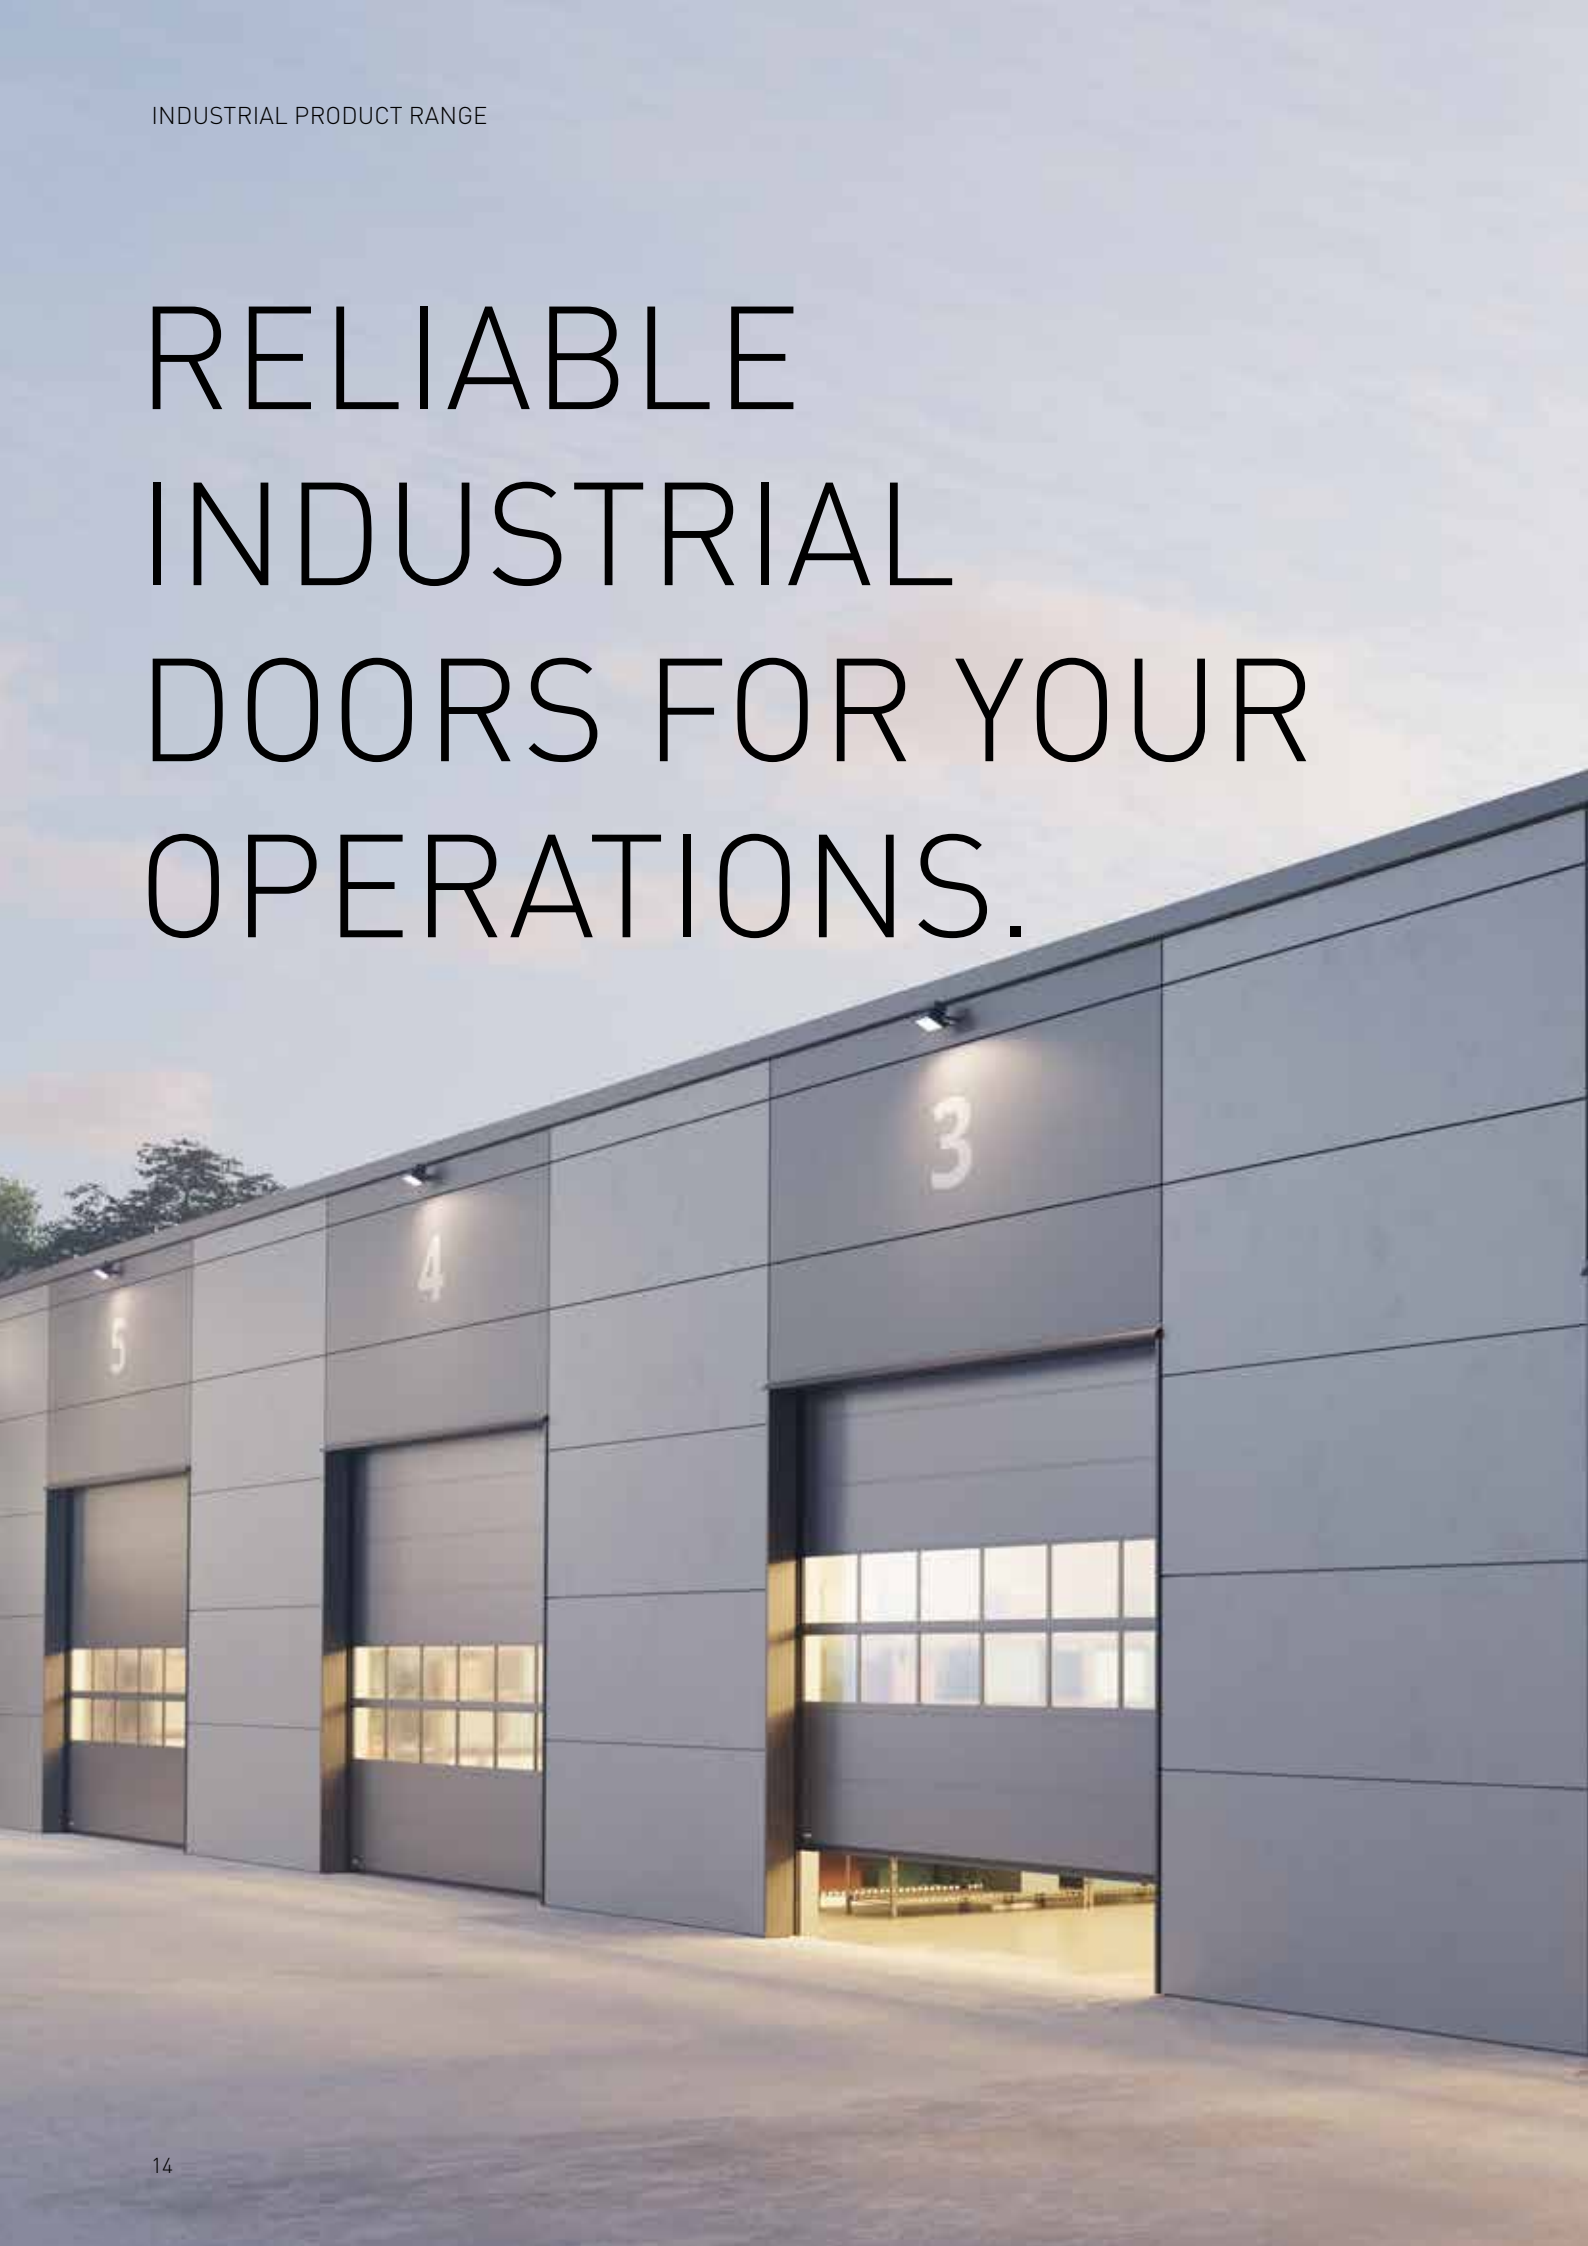
Our solutions integrate into any building architecture: from administration and education to culture and health, hotels and public buildings. We provide comprehensive support for projects from the initial idea to the final screw, offering advice, planning and implementation from a single source.

Thanks to the 62 modular system, you have over 400,000 variants at your disposal – for maximum freedom in technology, design and equipment. With TEO (Teckentrup Easy Online), you can configure and order our products quickly and easily, including validity checks.

Our portfolio

- Fire protection doors
- Tubular frame doors
- Smoke protection doors
- Soundproof doors
- Security doors
- Multi-purpose doors
- ATEX doors
- Stainless steel doors
- Customised special solutions, e.g. for high-security areas in data centres

RELIABLE INDUSTRIAL DOORS FOR YOUR OPERATIONS.



In an industrial environment, reliability and speed are equally important. Production and logistics processes only function if doors operate smoothly at all times – under any load and in daily operation. This is precisely what the systems from the INDUSTRIAL product range are designed for. They stand for operational reliability, durability and energy-efficient performance. They are highly reliable even at high cycle speeds or under demanding conditions. All Teckentrup industrial doors are used wherever movement is important: in logistics centres, production facilities, warehouses and industrial plants. They are available with customisable drive and control technology and can be precisely integrated into existing building and process structures. This results in comprehensive economic solutions that simplify and accelerate processes while remaining highly reliable.

Our portfolio

- Industrial sectional doors
- Roller shutters, high-speed roller shutters
- Roller grilles
- Fire protection doors
- Folding doors
- High-speed curtain doors

MODERN GARAGE DOORS FOR YOUR HOME.

A home is more than just a place – it is a living space. Teckentrup's HOME solutions combine intelligent technology, reliable security and a clear design concept. Our garage doors are designed to meet your needs, manufactured with precision and blend harmoniously into any architectural style.

High-quality materials and sophisticated mechanics ensure quiet operation and long-lasting functionality. Operation is convenient and safe – either manually or automatically. Functional features are available for added living convenience: LED lighting, safety light barriers, humidity sensors or optical parking aids.

Whether it's a new build or a renovation; modern, minimalist or traditional – with a wide range of design options, surface textures, colours and glazing, every garage door blends seamlessly into the overall look of the house.

Our portfolio

- CarTeck sectional door
- CarTeck up-and-over garage doors
- Rotary doors
- CarTeck drives
- Convenience features: Light barriers, LED lighting, humidity sensors, parking aid, smart home connection

YOU CAN COUNT ON THAT.

Teckentrup service means genuine partnership. We accompany you from the initial idea to long-term support during ongoing operations – reliably, transparently and on equal terms. This way, you, as a partner, builder or architect, can gain noticeable efficiency benefits in every phase of your project.

Our 360° services

- Technical consulting & project planning
- Measurement, installation, repair
- Maintenance with legally compliant contracts
- Rapid delivery programmes
- Service packages: from measurement to installation – everything from a single source
- Comprehensive service network
- Fast spare parts deliveries
- Installation and sales training, expert seminars
- Dedicated contact persons & technical hotline

TEO – Teckentrup Easy Online

TEO is Teckentrup's digital platform for planning and project management. It combines configuration, calculation, ordering and technical documentation in one integrated system. Doors can be individually configured, including performance data, recommended prices, drawings and tender texts. Validity checks support technical safety right from the early planning phase. Projects can be managed in a structured manner, saved and efficiently processed further at any time. For specialist retailers and installation companies, the Teckentrup Marketing Centre complements the platform with sales and marketing support: Product information, POS and campaign material, and campaigns are available centrally there. At the Teckentrup Campus, you can also book your seminars online and receive training and further education in practical assembly and product training courses.

WORKING FOR YOU WORLDWIDE.

With over 20 international partners and subsidiaries, Teckentrup implements projects that comply with standards, are certified and precisely tailored to country-specific requirements. Globally proven processes ensure reliable quality, while local contacts guarantee personalised support.

There is a particular focus on solutions for modern data centres. Our high-security door systems reliably protect sensitive IT infrastructures against fire, smoke, break-ins and noise, and meet the most stringent technical and climatic requirements. The systems can be seamlessly integrated into complex building structures and support sustainable, energy-efficient overall concepts.

WHEN EXPECTATIONS BECOME REALITY.

Teckentrup is at home wherever the highest standards of security, functionality and design are required. Our doors have proven themselves worldwide in prestigious architectural projects and demanding industrial applications. We don't just supply products, we also support every project in partnership with a clear goal: sustainable success and safety at the highest level, for example in the Elbe Philharmonic Hall Hamburg, Freiburg football stadium, the German Museum Munich and the Radisson Hotel Cape Town. You can find many more of our references at **teckentrup.biz/ren/eferences**.

Bethel Hospital, Bielefeld

The new children's centre at Bethel Hospital required door solutions that reliably meet high safety and hygiene requirements. Teckentrup supplied customised fire and functional doors for various areas of use – robust, easy to maintain and optimally suited to the sensitive hospital environment.

Roll the film: a goal from another dimension!

Roller shutter system covering 100 m², Magdeburg Port

One of the largest roller shutters in its class, with a shutter area of around 100 square metres, was constructed for a port logistics hall. The special design was engineered for high wind loads and intensive use and features reinforced drive and guide technology.

Crossrail stations, London

Security doors that must withstand extreme pressure, sound and fire protection requirements were used at Whitechapel Elizabeth Line station, London. Teckentrup developed high-security door solutions for this purpose that meet British standards and guarantee long-lasting functionality even under demanding conditions.

OPEN TO NEW IDEAS.

Developing progress, improving the tried and tested - ideas breaking new ground.

YOU CAN RELY ON US.

Development and production take place exclusively at our sites in Verl and Großzöberitz. This is where German engineering expertise, state-of-the-art technologies and a strong awareness of quality and responsibility come together. Because at Teckentrup, "Made in Germany" is not just a seal of origin, but a way of life. From supply and production to order picking and delivery, all our processes are based on a quality management system in accordance with DIN EN ISO 9001.

Short distances, efficient processes and the use of sustainable materials reduce resource consumption and ensure lasting quality.

Certifications & Standards

- FPD (Environmental product declarations)
- DIN EN ISO 14001 (Environmental Management)
- DIN EN ISO 50001 (Energy Management)
- DIN EN ISO 45001 (Health and Safety)
